12/8/15	6	Finished filling the other files with their necessary information and validated the form	Aaron Longchamp
	25 Hours	<=Total Time Spent	

Introduction Purpose

The purpose of this webpage renovation is to provide an updated web page for our client, Brian J. Supple M.D, so that his page looks much more contemporary while serving much the same purpose as his previous page – a central location for his clients to get information on his practice.

Overall Description

The update of this webpage will include a fresh CSS stylesheet with the details of a modern web page, information about Dr. Supple's hospital affiliations, his personal bio, client questionnaire forms, contact information and a brand new form that allows clients to review their encounter with Dr. Supple by leaving comments.

Story Board

Title

Navigation
Body for information, pictures, links for files, and the form.

Footer

Every page on the site is laid out in the same basic form (shown above). There is the title at the top of the page where the image for Dr. Supple is. Then just below it the navigation bar to change pages. Below that is the main body where all the text information, most of the images (a select few were housed elsewhere) and the form are located. And finally the footer with a slight bit more information and also to make a nice ending to the file.

Assignment requirements

1. Create a design specification for this project, being sure to include everything on all previous design specs:
   a. Cover page
   b. Time log
   c. Table of contents
   d. Introduction
   e. Purpose
   f. Scope
   g. Definitions, acronyms, and abbreviations
   h. Overview
   i. Overall description
   j. Story Board
   k. Specific requirements
2. Create a complete and fuctional web site incorporating the concepts learned in this class. You will of course need to have:
   a. Style sheet
   b. Form
      i. One text box for a users email address
      ii. Two additional text boxes
      iii. One list box
      iv. Three check boxes
      v. Three radio buttons
      vi. Submit button
      vii. Field sets and legends as needed
      viii. Data should be validated for not missing, valid format etc as needed with both html and php
      ix. Form should email the person who filled it out
      x. Form data should be saved to a file. Provide a link to this file on your main index
3. One page should open a data field and display the information in some way. (It could be a file of image names or it could be data related to your research, the file created by your form, etc).
4. Minimum of six pages
5. As always be sure to:
   a. Validate your html and CSS
   b. Have the following Meta tags: author, content, description
   c. Have a link on your sitemap to this assignment

Specific requirements

1. Style sheet
   a. Clean, "flat" interface with a modern, readable font
   b. Header and footer that sit at the top and bottom of the page
      i. Footer spanning entire with with header the width of content
2. Form
   a. Three text boxes
      i. Email
      ii. First Name
      iii. Last Name
   b. Three check boxes
      i. How did you hear about us (4)
      ii. Surgery performed (5)
      iii. Required testing (3)
   c. List box
      i. Rating system for Dr. Supple
   d. Radio buttons
      i. Were tests needed prior to surgery? Yes/no
      ii. Gender – Male/female
      iii. Insurance coverage (5)
   e. Additional comments section
3. Pages
   a. Home page
      i. Letter form Dr. Supple to potential clients
   b. About
      i. Photograph and biography page
   c. Affiliation
      i. Information about hospitals he works with
   d. Info
      i. Insurance that accepted, degree of experience, patient forms and more.
   e. Rate Me
      i. Form detailed above
   f. Contact
      i. Location of practice, phone, email
